

Distinguish, differentiate, compare and explain what is the difference between Classical and Modern Taxonomy. Comparison and Differences.

Difference between Classical and Modern Taxonomy

1. Classical Taxonomy deals with morphospecies. Modern Taxonomy deals with biological species.
2. Classical Taxonomy has a typological concept. Modern Taxonomy has a population or biosystematic concept.
3. In classical taxonomy, species is considered to be static. In modern taxonomy, species is considered to be dynamic.
4. classical taxonomy does not study evolution and inter-relationships of species. Modern Taxonomy studies primitiveness, advancement, and inter-relationships of species.
