

Distinguish, differentiate, compare and explain what is the difference between Evaporation and Distillation. Comparison and Differences.

Differences between Evaporation and Distillation

S.No.	Evaporation	Distillation
1	It is the process of vapourisation of solvent to get concentrated product.	It is the separation of constituents of a liquid mixture by vapourisation & again condensation.
2	Vapours are not collected.	Vapours are condensed & collected.
3	Concentrated product is obtained after evaporation.	Distillate is obtained after distillation.
4	Used for obtaining concentrated products and removing impurities.	Used for separation and purification of liquids from mixture.
