

Distinguish, differentiate, compare and explain what is the difference between Night Blindness and Color Blindness. Comparison and Differences.

Differences between Night Blindness and Color Blindness

S.No.	Night Blindness	Color Blindness
1	Night blindness is nutritional deficiency disease also known as nyctalopia.	Color Blindness is an inherited condition. This is genetic disorder due to defective gene.
2	It is inability to see under low light conditions, i.e night.	It is inability to differentiate between certain colours.
3	It is eye disorder, caused due to cataract or short sightedness.	It is caused due to low frequency of occurrence of cone cells in eyes, responsible for color.
