

Distinguish, differentiate, compare and explain what is the Difference between Rotation of Crop and Multiple Cropping. Comparison and Differences.

Difference between Rotation of Crop and Multiple Cropping

1. Rotation of crops is the process which helps to retain the fertility of the soil. The crops are grown alternatively. Raising more than one crop on the same field during the same season is known as multiple cropping.
2. Rotation of crop example: Wheat is grown in one season and sugarcane is grown in other. Multiple cropping example: Wheat and mustard.
