

Distinguish, differentiate, compare and explain what is the main difference between Gametogenesis from Embryogenesis. Comparison and Differences.

Difference between Gametogenesis from Embryogenesis

1. Gametogenesis is the formation of male and female gametes. Embryogenesis is the formation of an embryo from the zygote.
2. In Gametogenesis, gametes are the haploid cells. In Embryogenesis, an embryo is a diploid cell.
3. Both mitotic & meiotic cell division take place in Gametogenesis. Only mitotic division occur in Embryogenesis.
