

Distinguish, differentiate, compare and explain what is the Difference between Facebook and Facebook Lite App. Comparison and Differences.

Facebook has announced a new Android app called Facebook Lite, which is a version of FB built from scratch to work smoothly with poor data connections and low-end phones. The FB Lite app is small, allowing you to save space on your phone and use FB in 2G conditions.

Differences between Facebook and Facebook Lite App

Facebook's main app weighs in at 57 MB, Facebook Lite is a mere 2 MB- that's about 96.5% less space. Facebook Lite is designed to use less RAM and CPU power, as well as, so you'll get a smoother experience on cheaper and less powerful phones. Facebook Lite even works on older phones that are no longer supported by the regular app. FB Lite is almost as fully featured as the regular FB app. You can still like and comment on your friends' posts, visit their profiles, post to your own Timeline, and do everything else you normally do. FB Lite has a lot going for it. It's got all of FB's banner features, uses fewer system resources and less data, and works on slower connections. The only downside is that it feels kind of basic.

Facebook Lite Advantages

1. Has only the main Facebook feature
2. Uses less mobile data and takes up less space on your mobile phone
3. Works well on all networks, including 2G
4. Installs faster and loads your screen more quickly
5. Works on most Android or iOS mobile phones

Facebook Lite Drawbacks and Disadvantages

FB Lite doesn't have any disadvantages. But, if you own a high-end phone and have high-speed internet, then you will miss the standard app. That's because though the Lite app is fast overall, however, when it comes to individual actions, the app disappoints.

For which users is Facebook Lite?

Facebook Lite is for any user who wants to reduce the consumption of Facebook resources on their terminal, as well as the data consumption of their rate, at the cost of limiting some functions of the application. In the same way, all those who do not want to have Facebook Messenger installed on their smartphone, can also choose to use Facebook Lite as it has this component integrated into the main application.
