

HydraFacial is an amazing facial treatment technology, specially designed to create radiant, hydrated skin and increase overall skin health. Its slowly becoming one of the most popular skincare treatments in the world, with one HydraFacial performed every 15 seconds somewhere in the world. HydraFacial will leave you with glowing, dewy skin, rather than the reddened skin you may experience from a more invasive facial treatment.

## How Does a HydraFacial Work Exactly?

A [HydraFacial](#) uses a "medical-grade hydradermabrasion device" which performs a three-step treatment process - cleansing, exfoliating and then infusing the skin with serums. In just 30 - 60 minutes, you could have healthy, glowing skin. The HydraFacial can give you your best skin yet. Using its advanced, patented vortex technology, it treats hyperpigmentation, sun damage, acne, under-eye puffiness and reduces the signs of ageing. The superior technology of the HydraFacial machine, combined with the powerful serums, is what allows it to bring such an amazing result. Not only does the HydraFacial leave you with radiant, glowing skin, the infusion of serums vigorously works to improve skin health - helping you to look your best, because the healthier your skin is, the more your facial appearance is going to improve and the better you will look overall.

### Steps for the HydraFacial procedure

- Firstly the provider uses a vortex-like wand against your skin to help clear away dirt and oil from deep in your pores. They also use a peel to help exfoliate and resurface your skin.
- Then a vacuum-like attachment is used on the wand to help extract debris from your pores.
- Then a pen-like attachment is used to apply a moisturizing serum with antioxidants.

A HydraFacial is sometimes followed by other skin care treatments, such as dermal fillers or light therapy. These are considered add-ons and are not included as part of the HydraFacial.

## Potential Benefits of Getting a HydraFacial

HydraFacial provides antioxidant protection and hydration. It is a gentle facial rejuvenation safe for all skin types and tones and is performed in one appointment. The patented technology will cleanse, extract, hydrate your skin, clear deadskin cells, extract dirt and oil from pores, and infuse botanical substances to keep your skin glowing. There is no recovery time after your treatment. You may experience mild flaking or irritation, but these symptoms will not affect your daily activities.

HydraFacial is that it makes your skin firm and tight. It leaves your skin moisturized and hydrated. It is also common for people with sensitive skin to refrain from using any kinds of harsh chemicals or treatments. The benefits of HydraFacial for skin are effective on the sensitive skin type too. The vacuum technology cleanses the skin without imposing risks of skin damage or swelling.

HydraFacial results last up to two weeks, but to maintain your skin health, it is recommended you undergo a HydraFacial once or twice a month. HydraFacial treatments will maintain a glowing and healthy complexion; they are safe and one of the best procedures you can do for your skin.

## Which Machine / Devices are used in HydraFacial Treatment ?

A HydraFacial machine, also known as a hydrodermabrasion machine, HydraFacial microdermabrasion machine, hydra peel machine, is used for HydraFacial. "HydraFacial" is a popular facial treatment, usually performed with the HydraFacial MD by Edge Systems.

Aestheticians use a HydraFacial instrument to cleanse, exfoliate, extract and deliver rejuvenating serums and remove dead skin cells, dirt, debris while purifying and soothing the skin.

### Take Away

The benefits of HydraFacial for skin are well known. It not only help to hydrate and moisturize the skin, but it also restores the lost shine and glow on your skin. It also helps treat conditions like acne and pimples too. It's worth

trying at least once, if you can afford it. Plus, there's no downtime, so you'll walk out of your appointment with a fresh and glowing skin.
